TO WHOMSOEVER IT MAY CONCERN

We have known Mr. Vijay Chopra, Sanvik Engineers Pvt. Ltd. for almost 20 years and in this period have had dealings with the firm on many projects where they were the HVAC contractors. Some of these projects include,

1. British High Commission – Immigration Building
2. British High Commission – Medical Unit
3. IIS Infotech Ltd., Noida
4. Hyatt Regency, Kolkata
5. Sanskriti School, New Delhi

These projects were completed by Sanvik with commitment and emphasis on quality. We find them to be technically competent, very easy to deal with and provide a positive contribution to the success of the project. They are able to provide shop drawings for the work and also work in tandem with other contractors to provide for a well coordinated work. The personal involvement of Mr. Vijay Chopra is a major factor in their success.

We have no hesitation in strongly recommending Sanvik for any future work in the field of HVAC.
